Professional Summary

Computer Science graduate from Rutgers University. Looking for an entry level job to kickstart career out of university.

Skills

Programming Languages(Fluent): Python, C, JavaScript
Programming Languages(Familiar): Rust, Haskell, Java, OCAML, C++
Frameworks & Tools: Linux, Git, Docker, Node.js, React.js, PyTorch, Huggingface Transformers
Broad Technical Domains: AI-Driven *and* Human-Driven Software Development, AI Prompting, AI Systems Development, Electronic, Mechanical, and Software Diagnostics, Electronics Repair, Technical Writing
Other Skills: Public Speaking, Customer Service, Troubleshooting

Selected Engineering Projects

Semantic Drift Analysis *Python, BERTScore, NLP Tools*

- Designed and built an experimental framework to analyze semantic degradation across continuous LLM generation cycles.
- Automated text-processing pipelines utilizing cosine similarity and BERTScore to measure iterative data loss.
- Correlated algorithmic outputs with user-experience impact to evaluate human-AI communication decay.

HP Query *Python, Scripting*

- Identified repetitive work in checking warranty information when managing IT department assets at IAS.
- Developed a script to programatically query HP's website for warranty information based on csv data dumps from our inventory database.

Education

Rutgers University New Brunswick, NJ
Bachelor of Science in Computer Science May 2026
Selected Advanced Coursework: Artificial Intelligence, Machine Learning, Data Science, Algorithms, Object Oriented & Functional programming paradigms.

Brookdale Community College Lincroft, NJ
Associate of Science in Computer Science May 2023

Awards

National Merit Recognized Scholar: Awarded to approximately 50,000 of the highest-scoring students nationwide on the NMSQT exam.

Experience & Professional Highlights

Best Buy Feb 2026 – Present

Sales Specialist

- Retail Sales of consumer electronics.
- Work with and for customers in finding the ideal technology solutions for their needs
- Provide technological expertise across Computing, AI, Gaming, Appliances, Home Theatre, and more

The Institute For Advanced Study Sept 2023 – August 2025 (Intermittent)

IT Help Desk Intern

- Performed triage of incoming IT Help Desk tickets and escalated complex issues to appropriate engineering tiers.
- Provided comprehensive hardware and software support for PC and Mac environments, including Microsoft Office and Exchange.
- Managed equipment inventory and gained practical exposure to Microsoft Active Directory.

Starbucks & Jamesbrew July 2021 – Aug 2023

Barista / Barista Trainer

- Led training initiatives for new hires, ensuring mastery of complex beverage preparation and service standards.
- Managed high-volume, fast-paced service workflows while maintaining meticulous attention to product quality and customer experience.
